PRIMARY EXAMINER

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

US Patent 6,628,273 to Rindal, teaches a method for driving a matrix display that is similar to the claimed invention. The claimed invention however differs from Rindal, namely the applicant's invention calls for a plurality of column and row driving units. In Rindal's invention, there is only one column and one row driving unit (210c and 210r, respectively) where as in the claimed invention (applicant's figure 5 and figure 6) the applicant discloses a plurality of drivers, one for each row or column. The Rindal reference, however similar, could not be modified to resemble the claimed invention because the reference actually taught away from the use of a plurality of drive circuits in column 2, line 45. For this reason, the examiner finds this invention allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
